#### COMMISSIONER BRIAN MESERVEY:

**1.** Department computer upgrade project update: We now have a remote access app which will allow Commissioners to access files on their phone. Usernames and passwords to login to the app have been included in every Commissioner's folder.

• All computer upgrades are complete with appropriate logins. Do we want to create user logins for every member for the training room computer use?

Active members will be issued their own username and password. Commissioner Brian Meservey will contact Vector One to establish safe search firewalls.

- We have two additional new computers not in-use for location and use TBD
- We were advised to not be responsible for Association emails and they should be maintaining their own. I checked with VectorOne and they wouldn't be able to use @verdoyfd.org since we're using it as a District under our account. VectorOne mentioned that the easiest thing to do would be to pay for their email accounts and have the Association reimburse the District.

Discussion regarding email accounts and safe use. Attorney Greg Serio recommends that we contact the insurance carrier for the Fire District's Cyber Security Insurance.

- **2.** I contacted Verizon and had our internet speed bumped up from 200/200 to 500/500 to give us more bandwidth in the station.
- **3.** I will address at the next association meeting that if any members are experiencing any issues with any of the computer equipment to address them with me and I'll take care of it with VectorOne and to not go on their own into any settings to try to fix.
